Craft Ideas

- Lavender jewelry - Experiment with weaving fresh lavender stems into necklaces, bracelets, and headbands. Secure with tape, glue, or string.
- Picture frames - Purchase an unpainted wooden picture frame from your local craft store. Paint or stain the frame in the color of your choice. Gather dried lavender stems into a bundle and cut one to two inches off the bottom of the stems. Secure them with a ribbon. Glue this bouquet to the picture frame with a hot glue gun.
- Shapes on paper - Draw simple shapes such as stars, hearts, and flowers onto a piece of heavy card stock. Use a glue stick or clear Elmer's glue to fill the shape with dried lavender buds. Cut out around the shape, punch a hole in the top, and hang up with string, ribbon, or rafia.
- Baskets - Purchase a basket from your local craft store or find one from around the house. Weave fresh lavender stems into the basket for embellishment and fragrance. Dried lavender buds can also be glued around the top edge of the basket.
